

SHAC 2014-15 Working Action Model

The Asheville-Buncombe NC SHAC creates a solid communication channel between itself and each school's health and wellness team and the School Health Coordinators (Debbie and Michele). The SHAC has created a Working Action Model that will help them set goals, create action steps, get board/administrative approval when needed, market and educate our community and students in their new health and wellness programs and initiatives pertaining to the 10 areas of the Whole Child-Whole Health School Health Model (ASCD and the CDC 2014), and move us forward to evaluation.

SHAC members help facilitate on all levels of this Action Model based on requests from each school district and our SHAC agreements
